IU Reportable Object Codes

University Tax recently updated the listing of 1099 reportable object codes. Reportable object codes trigger tax reporting, such as miscellaneous income or royalty income, on a 1099-MISC tax form. University Tax used historic data to best determine which object codes should be reportable.

If you are unsure if your transaction should use a reportable object code, please review the 1099-MISC page for applicable situations or email taxpayer@iu.edu. Additionally, a list of reportable object codes is available in the Reference Material Library on the UCO website.

PHI Invoice Supplier List

Last month, we announced that the ability to view invoice images containing Personal Health Information (PHI) would be limited to Fiscal Officers. The spreadsheet linked below lists suppliers who have historically included PHI on some of their invoice images. Review the spreadsheet to see if your department’s orders will be impacted by this permissions change.
